- Lively

## INTRODUCTION

### ABOUT ME

Hi, I am Donavon! I am currently now waiting to pursue a degree in Electronic and Electrical Engineering at NTU. I am a very easy going person and love to engage in conversation so definitely feel free to chit chat with me!

I have always been fascinated by how math is all around us and I found myself more than often applying what I learnt in Math in real life. I hope to allow more students to also share this same passion as me.

My inclination are towards Mathematics. While studying the subject. I begin to develop a deeper understanding of the different formulas and equations. This helped me do better for application based questions. This would not have been possible if not for my tutors and teachers who really helped me internalize what I learnt. I would definitely want to pass this down to future students everywhere.
